## SOFTWARE PROJECT EXPERIENCE:

As a seasoned Senior full-stack web and mobile developer, I bring a wealth of expertise, particularly in utilizing Agile methodologies like Kanban and Scrum frameworks. My proficiency extends to project management tools such as Jira, Trello, Asana, MS 365, Slack, Monday.com, and Notion, showcasing my ability to collaborate effectively with team members and manage project timelines.

## FRAMEWORKS:

### Front End Stacks:

Expert level of React.js - 6 years

Angular.js - 4 years

HTML, CSS/SCSS/Tailwind - 8 years

JavaScript/Typescript/ECMAScript - 6 years

DOJO toolkit, Chakra, JSON, AJAX, XML, Vuetify, jQuery, NestJS, Rust, Next.js, Vue.js: 7 years

### Backend Stacks:

Java/SpringBoot - 8 years Python / Django - 8 years Core PHP / Laravel - 6 years

Ruby / Ruby on Rails - 4 years Node / Express - 6 years

.Net and C# - 6 years Golang - 4 years

### Mobile Development Stacks:

Java, Kotlin for Android Applications - 8 years Objective C, Swift for iOS Applications - 8 years

React Native – 7 years

Flutter Dart - 5 years

### Database Technologies:

OracleDB, Oracle Apex – 10 years MySQL - 8 years

PostgreSQL - 6 years

MariaDB – 5 years MongoDB - 3 years

Microsoft Server - 9 years

### DevOps/Infrastructure and Architecture:

Expert Linux OS user – 10 years  
Docker, Kubernetes, and compose – 6 years  
AWS, Microsoft Azure - 6 years  
Microservices - 6 years AWS CDK, Jenkins  
Ansible, Digital Ocean and Heroku – 10 years  
CI/CD and Unit Testing Tools: Jest, Selenium, J-unit, Xunit, Nunit, Pytest, Enzyme, and Mocha - 5  
Wordpress, Drupal, Joomla, Wix - 12 years Salesforce, Service Now - 10 years

## **EMPLOYMENT HISTORY:**

### **Consultant/Lead Fullstack Developer - VibeMap**

**URL:** [www.vibemap.com](http://www.vibemap.com)

**Objective:** At VibeMap LLC, a startup focused on enhancing local travel experiences through a web-based platform, we faced the challenge of developing a robust, scalable, and user-friendly application. As the Lead Developer, my responsibility was to oversee the full development lifecycle, from conceptualization to deployment, ensuring the application was both efficient and effective in meeting our users' needs.

**Responsibilities:** My primary tasks involved:

- **Frontend Development:** To create an intuitive and responsive user interface that could adapt to various devices and screen sizes.
- **Backend Development:** To ensure the backend was scalable, secure, and capable of handling concurrent user requests efficiently.
- **Database Management:** To design and manage a database that could store and retrieve data quickly and securely.
- **DevOps Practices:** To streamline our development and deployment processes, ensuring continuous integration and delivery.

**City / State:** San Francisco, CA

### **Fullstack Dev, Capture and PRODUCT MANAGER - NYconsultant.us dba IAMA**

**CleinBuerger (Sep 2021 - current) Part time**

**URL:** <https://www.nyconsultant.us/>

**Technologies:** Javascript, Jira, Confluence, Postman, Swagger, Prometheus, OpenAi API, CSS, HTML5, Microsoft 365, Java/SpringBoot, Agile, Azure, Wordpress

**Responsibilities:** I work closely with cross-functional teams, such as engineering, design, and marketing, to develop and launch products. I create product roadmaps that outline the product's development plan over time. This includes defining product features, prioritizing features, and setting timelines for development. This involves communicating product requirements, collaborating on design decisions, and managing product launches. I discovered business development opportunities. I also research grants and funding sources. I help to provide guidance on capacity building. I navigate governmental systems and agencies. I work with stakeholders to define a clear vision for the product and develop a strategy to achieve that vision. This includes understanding market trends, identifying user needs, and defining product goals and metrics. I am constantly gathering and analyzing user feedback to ensure that products are meeting user needs and expectations. This involves conducting user research, analyzing user data, and responding to user feedback.

**City / State:** New York, New York

### **BACKEND DEVELOPER AI-powered Book Recommendation Engine: Part time W2 (Feb 2018 - Aug 2023)**

**URL:** <https://www.goodreads.com/>

**Objective:** Developed a web application that utilizes machine learning algorithms to recommend

personalized book choices based on user preferences and past reading history.

**Technologies:** ASP.NET Core MVC, TensorFlow or PyTorch (for AI), Entity Framework Core (for user data), Book API, AWS, DynamoDB, Flutter

**Responsibilities:** I had to build a clean and intuitive interface for user interaction, train a recommendation model using relevant ML libraries, integrate the model with the backend API, and deploy the application to a cloud platform.

**Key Achievements:** The role showcased my ability to combine .NET skills with cutting-edge AI technologies, demonstrate data analysis and recommendation system expertise, and potentially create a valuable tool for book lovers.

## **Consultant/ PRODUCT MANAGER AND SENIOR FULL-STACK MOBILE AND WEB DEVELOPER - VibesMeet UK/Remote (Feb 2020 - August 2022) 1099 role**

**URL:** <https://www.vibesmeet.com/>

**Technologies:** Reactjs, Python Django, Microservices, Azure cloud, AWS, Postgres database, React native, Tailwind

**Responsibilities:** As a Senior developer on a greenfield project, I established the Github repository, conducted research to determine the best setup, created a documentation plan, set up the backend core structure, and ensured the client's desired ideas and tools were incorporated. I also actively participated in front-end and back-end development, provided guidance, assigned tasks, conducted code reviews, and managed daily stand-up meetings to ensure progress alignment with the project timeline.

## **Senior MOBILE AND FULL STACK DEVELOPER - SaveNwin Discount App USA (Aug 2017 – Feb 2020) Perm role**

**URL:** <https://vip.savenwin.com/>

**Technologies:** Nodejs, ReactJS, Typescript, MongoDB, SWIFT, Kotlin, TDD, Heroku, GCP

**Responsibilities:** As a lead developer, I was responsible for building the RESTful APIs for an e-commerce web application using Node.js. The front-end pages were developed using React. I successfully led a team of three developers in this project from its inception to completion, excluding the mobile component. My contract has since ended.

**City, State:** Richmond, Virginia

## **Consultant / FULL STACK DEVELOPER - Interactive Educational Portal: (2017 - 2018) Freelance**

**URL:** <https://kahoot.com/>

**Objective:** I was part of the team that designed and developed an interactive web platform offering engaging educational content, quizzes, and gamified learning experiences for students of all ages.

**Technologies:** VueJS, ASP.NET Core MVC, Razor Pages, SignalR (for real-time interactions), Entity Framework Core, AWS

**Responsibilities:** Create dynamic learning modules, quizzes, and gamified elements, implement real-time features for user interaction and collaboration, and ensure engaging content delivery through user-friendly UI/UX design.

**Key Achievements:** Display your talent for building interactive educational tools, demonstrate proficiency in front-end and back-end development with .NET, and potentially contribute to improved learning outcomes for users.

## **Consultant / Senior DEVELOPER – Zerotech Agency (July 2015 – July 2017) Perm role**

**URL:** <https://zerotechagency.com/about-us/>

**Technologies:** Swift, Java, Flask, HTML, TensorFlow, PHP, AWS, Solana, Blockchain, ML, AI, VR, AR, HAAI, Salesforce, OracleDB, Oracle Apex, SCRUM, C# .Net, C++, Microsoft Server

**Responsibilities:** As a full-stack developer in a permanent role, I was involved in both front-end and

back-end development, with a focus on the VueJS front-end work. Although, I played a crucial role in the creation of a deployment pipeline for a web-based travel application, utilizing Jenkins, Ansible, and Docker. I was responsible for the development of both the back-end using Django and the front-end using React, based on features outlined in Figma mocks. I utilized Vanilla and Compost Cloud tools to complete the project. script, Angularjs, PHP, Scala, AWS, MariaDB.

I was tasked with building a web hosting application, which included a sign-up flow, user dashboard, and a back-end system for inventory management and project/product management. My role involved extensive validation, integration, and API calls. Although the web component of the application is still in development, my contract with the company ended before it was launched. I was responsible for updating both Android and iOS applications. The updates were implemented using the Swift programming language. To enhance the functionality of the applications, I also utilized GraphQL, a query language for APIs, and Agora, a real-time communication platform. These technologies helped to deliver a seamless and efficient user experience for the applications.

### **Residential Advisor at N.A.I.C.A Transitional Housing Facility (May 2012- June 2015)**

#### **Perm role**

**URL:** <https://www.naicany.org/>

**Technologies:** Microsoft Word, Powerpoint, Excel, Wordpress PHP, Salesforce, ServiceNow, Agile

**Responsibilities:** I was brought on the project to fix certain issues and push the project from start through to the finish line. The team was going through some finalization issues that had to do with scalability and maintenance using AWS and its services. I leverage my skills in cloud computing to solve the issues. I mentored junior developers, assigned tasks, implemented refactoring, and did code reviews. Explained facility rules and regulations to clients, maintained records on DHS computer system. I made sure and assisted clients to be in full compliance with facility policies, worked with case managers on clients' compliance, and operated the front desk in full clerical and administrative capacity.

### **Database Admin and Assistant Community Liaison - Latino Pastoral Action Center (LPAC) (May 2008- June 2011) Perm role**

**URL:** <https://www.lpacnyc.com/>

**Technologies:** Microsoft Excel, Drupal, Joomla, MS Word, Powerpoint, Wordpress PHP, Trello, OracleDB, SQL, Drupal, Oracle Apex, Microsoft Server

**Responsibilities:** Assisted in all meetings and maintained schedules for office management, recorded events and activities for non-profit records. Facilitated workshops and orientations for at risk youths in probation programs. Also, I developed and maintained websites and web applications. We used Agile/SCRUM methodologies on the SpecNota and Trello platform. I collaborated closely with business analysts, end users, and the QA team to ensure market-quality standards and implement necessary changes. Additionally, I worked in partnership with the creative and product teams to ensure a consistent design and user experience throughout the development and execution process.

### **College Assistant to the Director of IT - Hostos Community College (March 2004- June 2011) Perm role**

**URL:** <https://www.hostos.cuny.edu/>

**Technologies:** Microsoft Word, Microsoft Excel, Microsoft Powerpoint, Wordpress, C++, Service Now

**Responsibilities:** Organized activities for student life, collaborated on events with student clubs and organizations. Provided students with extra educational and leadership skills assistance, increase development and participation with faculty and administrators.

**Gaps:** *During the gap periods in my employment history, I took a proactive approach to invest in my professional development and enhance my skill set. I dedicated time to self-directed learning, exploring emerging technologies, and participating in relevant online courses. This*

*breaks allowed me to stay current with industry trends and deepen my expertise, ensuring that I bring the latest knowledge and skills to any role I undertake.*
